***Election/Restrictions***

Applicants response received October 22, 2003 has been received and entered. Claim 8 has been canceled and new claims 9-14 have been added. Consequently, claims 1-7 and 9-14 are pending in the instant application.

Newly submitted claims 9-14 contain multiple inventions and are subject to restriction in view of MPEP 803.04. MPEP 803.04 sets forth that molecules with a distinct sequence are distinct inventions. Claim 9 recites forty-six distinct primary, secondary, and tertiary amino acid sequences. Each of these sequences are grouped as a separate invention in light of MPEP 803.04, Applicant is required to elect a single sequence for prosecution. Note this is not an election of species requirement.

Furthermore, claims 12-14 are also restricted as patentably distinct from each other, given that botulinum toxin type A, B and E, each have a separate distinct structure.

Accordingly, Applicant is required to select a single toxin type and a single SEQ ID NO: for further prosecution. Applicant is further required to furnish a statement reciting which claims read on the elected toxin type and SEQ ID NO.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1645

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
